EDUCATION

SVKM's Dwarkadas J. Sanghvi College of Engineering
B.Tech in Information Technology

2024 – 2028
CGPA: 8.95/10

EXPERIENCE

DJS Antariksh, DJCSI & DJS CodeStars Websites

2025 – Ongoing

Top Contributor, Official Committee Websites | Teams of 1–30 contributors

- Engineered animated UI using **GSAP, Framer Motion, and Three.js** across **3** committee websites, delivering interactive sections that increased visual engagement per site.
- Optimized performance-critical 3D components, raising Lighthouse scores from **44 to 68** — a **55% improvement** — on render-heavy pages.

Industrial Metal Factory Website

Dec. 2025

Frontend Developer | Legacy Migration: PHP to React Vite

- Architected a responsive React UI across **12** pages with improved navigation structure and subtle motion design.
- Delivered a production-ready site within a **2-week** launch window, receiving positive stakeholder sign-off.

TECHNICAL SKILLS

Languages: Python, C, C++, Java, JavaScript, HTML, CSS

Frameworks: React, Next.js, FastAPI, LiveKit, LangChain

Libraries: NumPy, Pandas, Matplotlib, Seaborn, Three.js, GSAP, Framer Motion, Recharts

Developer Tools: Git, GitHub, Figma, PapaParse, Jupyter Notebook, ESP32, Arduino, Blender

Competitive Platforms: LeetCode, HackerRank, CodeChef, Codeforces

PROJECTS

Roam : Gemini-Based Heritage Tour Guide | *Python, WebRTC, React Native Maps, Gemini 2.5*

Mar. 2026

- Built a full-stack mobile app with **React Native + Expo** featuring GPS-based walking tour navigation, landmark verification via **Gemini 2.5 Vision**, and word-synced AI narration across **4 languages** and **4 storytelling styles**.
- Designed a real-time voice AI guide using a **Python LiveKit agent** with **Gemini 2.5 Flash** Native Audio over **WebRTC**, enabling context-aware conversations with live tour progress.

Rift Wrapped : League of Legends Year Rewind | *React, TypeScript, FastAPI, AWS Bedrock*

Nov. 2025

- Implemented the full React and TypeScript frontend for an analytics platform during a **DevPost** hackathon, processing data across **100+** matches per player.
- Surfaced **10+** AI-generated gameplay insights per player via Riot API and AWS Bedrock, with sub-**5-second** initial load time.

OriginTrace : Recursive Supply Chain Tracker | *NextJS, FastAPI, OpenYeti, SEC Edgar*

Apr 2026

- Built a graph-based system that reconstructs multi-tier supply chains from a company using open customs data, resolving HSN codes and recursively tracing upstream suppliers across countries.
- Implemented BOM-aware filtering and geo-mapped visualization to surface relevant supplier networks, trade flows, and concentration risks.

ACHIEVEMENTS

- Solved **280+** DSA problems across LeetCode, CodeChef, and Codeforces.
- **Hackathons:** Won \$1000 at Rift Rewind Hackathon (AWS × Riot Games); 3rd Place — Code Relay; Second Runner-Up — CSI SPIT Frontend Hackathon; Participant — CodeShastra XII, HackOps, MumbaiHacks 2025, HackFusion 2026, Gemini Live Agent Hackathon, Synergy 4.0.
- **Competitions:** Ranked **7th** — SPIT CodeHunt 2024; Ranked **9th** — CodeBusters 2025; Top **3** SY teams — CP++ (SPIT).

EXTRACURRICULARS

Technical Co-Com — DJS CodeStars

Oct. 2025 – Present

Organized competitive programming contests and designed original DSA problem sets.

Technical (Web) Co-Com — DJCSI

Sept. 2025 – Present

Maintained the official CSI website and 3 other themed-event websites

Coding Member — DJS Antariksh (Mars Rover Team)

Mar. 2025 – Mar. 2026

*Contributed to robotics software development using **ROS2** on Linux.*
